PATIENT INFORMATION

Preparation for an MSK ultrasound scan

ULTRASOUND SCAN PREPARATION

An ultrasound scan examination obtains a picture of the inside of the body without the use of X-rays. It involves inaudible sound waves being transmitted through the skin and reflected back by internal organs and structures. From these, a picture is produced on a TV screen.

The examination is pain free and is usually completed within 20 minutes.

Instructions to patient

- **Do not** stop taking vital medications such as steroids, heart drugs, blood pressure tablets etc.
- If you are not able to attend, please contact us to rearrange your appointment. We are then able to offer the appointment to someone else.
- We regret, no further appointment will be given for non-attendance

Note: If these instructions are not followed then we will not be able to perform the ultrasound scan.
